

Api for collecting cryptos twitter textual data

- [Tweepy](#)
 - With auth
 - Search tweet limitations: just last 7 days tweets
 - Search and users tweets request per minutes limitation
- Similar to tweepy: twarc, python-twitter and others
- [Snsrape](#)
 - No auth
 - No limitation for search api about old tweets
 - Can do advanced search with operators of twitter, like cashtag and hashtag,...
- [Scweet](#)
 - No auth
 - No limitation for search api about old tweets
 - Use selenium and need chrome and can't run in colab(maybe)but is ok in local
 - Limit search query options, just 'OR' and 'hashtag' operators
- [getOldTweets3](#) **(not working)**
 - No auth
 - No limitation for search api about old tweets
 - Problems
 - Twitter search api url has changed and there isn't any update for library
- [Twitterscraper](#) **(not working)**
 - No auth
 - No limitation for search api about old tweets
 - Problems
 - There is Error in code,but some people in github suggest to edit code manually
- [Twint](#)
 - no auth
 - No limitation for search api about old tweets
 - Problems
 - Lang arg doesn't work, should change code manually
 - Number of tweets is low, should search and find problem and maybe change code
 - Seems it doesn't support all search query operators like cashtags and should check code for this

Test some apis:

- [On colab](#)
